DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-30 and 34-42 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 6-22, 24-30, and 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by *Prince* (US 5,553,619).

Claims 1, 6, 14, 18, 22, 31, and 34: Prince anticipates all claimed features in claims 1, 6, 14, 22, 31, and 34. Prince discloses a method and apparatus for injecting contrast medium into a patient where the method and apparatus includes establishing a first phase of an injection protocol to inject saline solution to flush the tubing and establishing second phase injection protocol to inject contrast medium such as Gadolinium (col. 18, lines 30-46).

Claim 2: Prince also anticipates establishing third phase of flushing medium to clear out the contrast medium injection, so as to establish next phase of injection.

Claims 3 and 4: Prince establishing minimum infusion or injection rate (col. 18, lines 47-63).

Claims 7-11, 15-17, 19, 24-28, 35, and 36: Prince anticipates control device and pump to inject contrast medium and flushing medium phase set at pre-selected or pre-programmed amount at the selected rate determined above, volume, and time period (col. 21, lines 30-46).

Claims 12, 13, 20, 21, 29, and 30: Prince anticipates at least dual vessel to injection contrast medium and saline solution with injection control include pump 20 in figure 7.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 23, 37, and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Prince* as applied to claims 1, 6, 14, and 22 above, and further in view of *Wilson et al* (US 5,573,515).

Prince substantially discloses all claimed features in claims 5, 23, 37, and 38. However, Prince does not anticipate a user interface control selector is a touch screen. Wilson et al teach an apparatus to inject contrast medium where the user interface control includes touch screen (col. 11, lines 16-18). Therefore, it would have been obvious to one having an ordinary skill in the art at the time the invention was made to apply Wilson et al's teaching of using touch screen as an user interface to control the injection to improve the user interface of Prince's contrast medium injector.

Allowable Subject Matter

6. Claims 31-33 and 39-41 are allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
